Optimal browser settings

Even if our web page is compatible with mostly all browsers, we recommend the following improvement:

- the Internet Explorer 11.0 (or a higher version) or
- the current Mozilla Firefox version

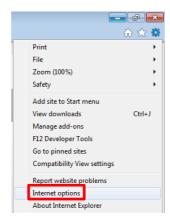

with a pixel resolution of 1280 x 1024 (24 bit graphic with 16 million colours).

On the following pages you will see the settings for the Internet Explorer, softwareand resolution recommendations and the settings for the Mozilla Firefox.

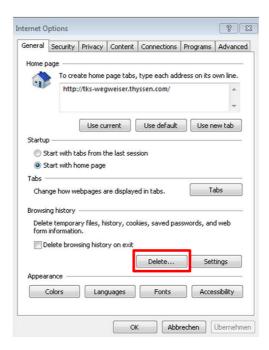

1 Optimal browser settings for Internet Explorer

Please conduct the following browser settings for **Internet Explorer**:

Click "Tools" in the menu bar and choose "Internet options".

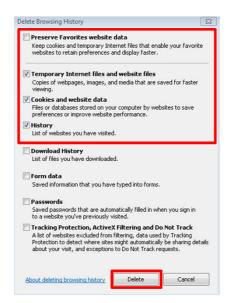

On the tab "General" in the area "Browsing history" click on the "Delete..." button.

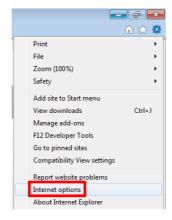

1 Optimal browser settings for Internet Explorer

Activate the check marks "Temporary Internet files and website files", "Cookies and website data" and "History". Please make sure that the option "Preserve Favorites website data" is **not activated**!

Finally click on the "Delete" button to delete your browsing history.

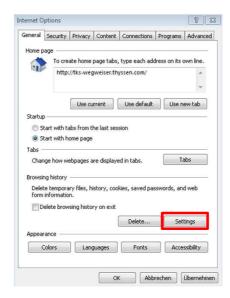

Click "Tools" in the menu bar and choose "Internet options" again.

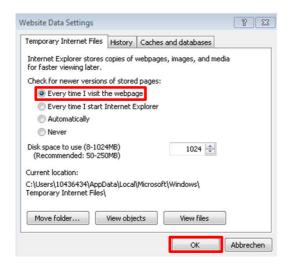

1 Optimal browser settings for Internet Explorer

On the "General" tab in the area "Browsing history" click on the "Settings" button.

Choose the option "Every time I visit the webpage" and confirm afterwards with "OK".

2 Software and resolution recommendation

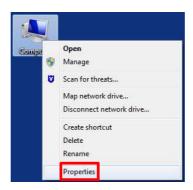

We recommend the following software and resolutions:

- Current version Microsoft Internet Explorer
- Current version Adobe Acrobat Reader
- Current Adobe Flash Player
- Microsoft Excel 2007 or a higher version
- Operating system Windows 7 or higher

2 Software and resolution recommendation

Current Service Pack - Windows 7 (Service Pack 1)

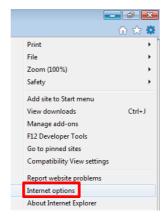

Here you will see the information, which Service Pack Version is installed. Single-click with the right mouse button on the desktop on "Computer", then click on "Properties".

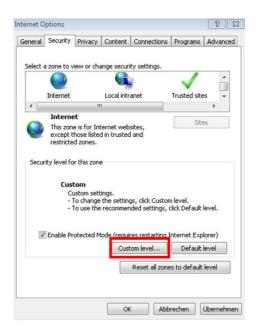

2 Software and resolution recommendation

To **activate** the **scripting** (for the zone "internet") click the "Tools" menu in the menu bar and choose "Internet options".

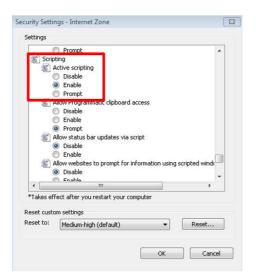

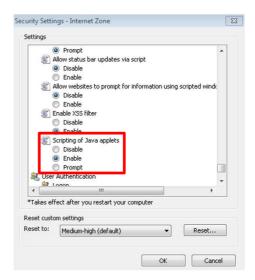

On the "Security" tab in the lower part of the area "Security level for this zone" click on the "Custom level..." button.

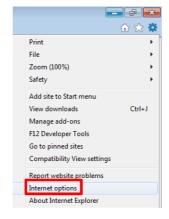

2 Software- and resolution recommendation

Scroll down to the part of "Scripting". Make sure that the option "Enable" in the area of "Active scripting" and "Scripting of Java applets" is chosen, and confirm afterwards with "OK".

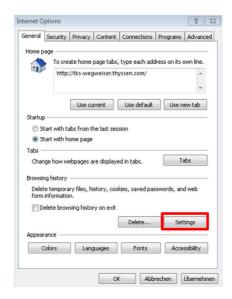

To **reduce the disk space** for temporary internet files **to 8 MB**, click "Tools" in the menu bar and choose "Internet options".

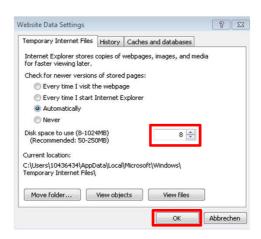

2 Software and resolution recommendation

On the "General" tab in the area "Browsing history" click on the "Settings" button.

Make sure, that in the area of "Disk space to use" an "8" (for 8 MB) is listed and confirm with "OK".

3 Optimal browser settings for Mozilla Firefox

Please conduct the following browser settings for Mozilla Firefox:

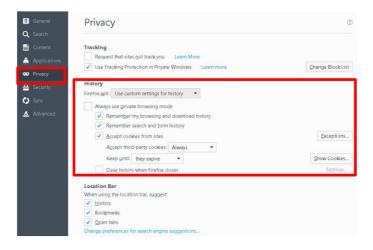

Activate current JavaScript.

Accept Cookies:

To accept cookies for Mozilla Firefox, click "Tools" in the menu bar and choose "Options".

In the window "Options" choose the tab "Privacy" and choose the setting "Use custom settings for history" in the area of "History" in the drop-down menu. Activate all the checkmarks as below.

3 Optimal browser settings for Mozilla Firefox

Configure the cache:

(corresponds to the setting "Every time I visit the website" for Internet Explorer)

Type "about:config" into the address bar and press ENTER.

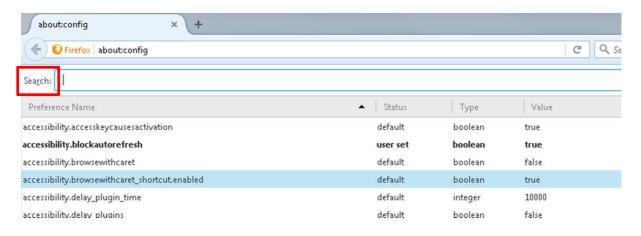

If a pop-up window opens, make sure that the check mark is activated and click afterwards on the button "I'll be careful, I promise!".

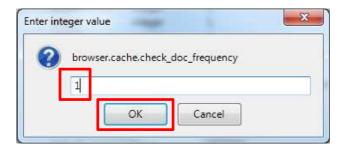

3 Optimal browser settings for Mozilla Firefox

A long list appears. Search for the entry "browser.cache.check_doc_frequency". Click the corresponding row twice with the mouse.

Afterwards a window appears with a number (probably "3"). Change the number to "1" and confirm by clicking on "OK".
